Samantha Taylor
BVetMed (Hons) CertSAM DipECVIM-CA MRCVS

Improve Veterinary Education's General Practitioner Certificate (GPCert) /Postgraduate Certificate (PgC) Program in Feline Practice has been developed to provide you with the knowledge and confidence to boost your performance in handling feline patients.

“ I decided to study for Improve Veterinary Education's Postgraduate Certificate (PgC) in Feline Medicine to increase my knowledge base and to build my confidence in dealing with feline cases. I have already noticed a vast improvement in my clinical confidence and abilities and now am even more driven to continue learning. The PgC has enabled me to enhance the level of care I provide to my patients and those of my colleagues. It has also instilled in me a more empathetic approach to feline patients in general within the practice.”
